DETAILED ACTION

Allowable Subject Matter

1. Independent claims 1, 3, 5-6, 8, and 10 and dependent claims 4, 9, and 11-14 are allowed. The following is the Examiner's statement of reasons for allowance.

Independent claims 1 and 6 were previously rejected under U.S. Patent No. 5,410,601 issued to Hashimoto (hereafter Hashimoto '601) and U.S. Patent No., 6,357,046 issued to Thompson et al. (hereafter Thompson '046).

Independent claims 3, 5, 8, and 10 were previously rejected under Hashimoto '601 and U.S. Patent No. 4,849,836 issued to Kachikian (hereafter Kachikian '836).

Pending claims as amended rely on the following limitations:

- 1. Data in the baseband video, specifically in the blanking interval;
- 2. Such that the data *is not recorded* by particular video recorders.

The first limitation is well known in the art. For example, closed captioning information is often stored in blanking intervals.

However, the second limitation is what distinguishes pending claims from prior art.

Examiner reads the term "particular video recorders" to be "non-compliant/problematic video recorders" as distinguished from "compliant/special video recorders" as set forth in the written description of the specification, page 3, ln. 30 to page 4, ln. 25. Additionally, Examiner reads the limitation of particular data being, "not recorded" as never being persisted on a recording media.

Hashimoto '601, discloses a scrambling system. Should a problematic recorder record the scrambled signal of Hashimoto '601, it would record the entire signal. Any secure data,

Application/Control Number: 09/490,836

would also be recorded. Although the data would be scrambled, it would be persisted on a recording media, as opposed to the pending application.

There are several means by which secure data may be sent as not to be recorded. Some systems send data over other transmission lines. Others send data over vestigial sidebands. However, pending claims recite that the data is in a predetermined part of a modified baseband, video signal, in a blanking interval, and furthermore that that predetermined part is not recorded along with the rest of the signal by "non-compliant/problematic video recorders." Because the techniques to prevent recording of data in the prior art apply to different types of transmission, they do not apply to the modified baseband, video signal, blanking interval of the pending claims.

For these reasons, independent claims 1, 3, 5-6, 8, and 10 and dependent claims 4, 9, and 11-14 are allowed.

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick J Santos whose telephone number is 571-272-4028. The examiner can normally be reached on M-F 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Safet Metjahic can be reached on 571-272-4023. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
